JATIN SANDIP KOLHAPURE

Full Stack Java Developer | Spring Boot | Backend & FinTech | React

Solapur, Maharashtra | +91 8830707654 | jatinkolhapure@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

PROFESSIONAL SUMMARY

Full Stack Java Developer with a backend focus, pursuing MCA (2027) with a first-year CGPA of 9.02 and a University 1st Rank in BCA. Strong in Spring Boot, Spring Security and secure REST APIs backed by PostgreSQL, with working React and JavaScript skills to build the UI layer. Built NexusPay, a deployed 7-service payment platform (Kafka, Redis, Docker, Azure), and the backend of a freelance client project, PG Manager. Seeking Java backend / full stack / FinTech roles from January 2027.

TECHNICAL SKILLS

Core Java: OOP, Collections, Generics, Multithreading, Java 8-21 (Streams, Lambdas, Records)
Backend: Spring Boot, Spring Security, Spring Cloud Gateway, REST APIs, JWT/OAuth2, RBAC, JPA/Hibernate, Razorpay Integration
Databases & Messaging: PostgreSQL, MySQL, Flyway, Kafka, Redis, MongoDB (exposure)
Frontend: React, JavaScript, TypeScript, HTML5, CSS3
DevOps & Tools: Docker, Nginx, Azure (VM deployment), Git, Maven, Swagger, AWS (exposure)
Testing & Problem Solving: JUnit, Mockito, DSA (100+ LeetCode problems solved)

EDUCATION

MCA - MIT Vishwaprayag University, Solapur, Maharashtra | 2nd Year (Pursuing) | Expected 2027 — **CGPA: 9.02 (1st Year)**
BCA - D.H.B. Soni College, Solapur, Maharashtra | Graduated 2025 | University 1st Rank — **CGPA: 9.77**
HSC (12th) - H.N.C.C. College, Solapur | Passed out: March 2022 — **67.50%**
SSC (10th) - Nelkantheshwar High School | Passed out: March 2020 — **80.60%**

PROJECTS

NexusPay – Distributed Payment Gateway *Java 21 | Spring Boot | Kafka | Redis | PostgreSQL | Docker | Azure*

- Architected a **7-service microservices payment platform** (payment, merchant, fraud, ledger, notification, webhook + **Spring Cloud Gateway**) on **Kafka** and **PostgreSQL**, decoupling payments from fraud checks, ledger posting and alerts.
- Secured the platform with **JWT/OAuth2, RBAC, Redis-backed rate limiting and audit logging**, and enforced **idempotency keys** to prevent duplicate charges from client retries and message redelivery.
- Integrated **Razorpay (TEST mode)** with failure-aware handling for declined, timed-out and retried payments, plus **HMAC-signed webhooks with exponential-backoff retry** and a **double-entry ledger** for consistent financial state.
- Deployed on **Azure ARM64** with Docker Compose and HTTPS Nginx on a custom domain; **35+ Swagger-documented REST APIs**.
- Validated with **75 automated tests and 9/9 regression checks**, achieving **zero test failures** before deployment.

PG Manager – Freelance Backend Developer | Independent Client Project *Spring Boot | PostgreSQL | Flyway | JWT*

- Owned backend development of a property-management platform for PG/hostel operators, built for a real client; delivered a **Spring Boot backend exposing 72 REST APIs** consumed by a React/TypeScript frontend built by a separate developer.
- Secured the APIs with **stateless JWT authentication and role-based access control (Admin/Tenant)**, keeping administrative and tenant operations separated.
- Designed a **19-table PostgreSQL schema** for properties, rooms, beds, tenants and rent, managed through **Flyway versioned migrations** for consistent schema changes; added **bed-occupancy checks to prevent double-booking**.
- Implemented **Razorpay online rent collection** (order creation, payment verification, status reconciliation) and automated **monthly dues and deposit deductions**.

StudentHub – Collaboration & ML Learning Platform *Spring Boot | React | Random Forest ML | MySQL*

- Built a full-stack Spring Boot + React platform with **50+ REST endpoints** across peer collaboration (senior students post projects, juniors request to join), LeetCode/GFG submission tracking, and an admin panel.
- Trained a **Random Forest** model on a custom StudentHub dataset to generate personalized reports identifying gaps between a student's skill profile and industry-readiness benchmarks.

CERTIFICATIONS

Java with DSA - Apna College | Introduction to Cybersecurity - Cisco | AWS Cloud Essentials - Coursera

ACHIEVEMENTS

University 1st Rank, BCA | Runner-up, VishwaCode Hackathon - MIT Vishwaprayag University | 100+ LeetCode solved
